

Kingston Court

Residential Landscape

Kingston Court is one of three refurbished apartment blocks in Sneinton as part of the Nottingham Greener HousiNG2 Initiative. Hosta Consulting wanted the regeneration of the area to flow into the gardens and create a space that the residents could enjoy.

The front car park features a species rich wildflower meadow that attracts a whole host of birds and insects. In the rear gardens a patio area surrounded by a pergola and scented climbing plants was created, featuring a mix of 'sun loving' plants as well as shade tolerant plants to cope with the trickier conditions. The redevelopment of the front and rear gardens of Kingston Court provides residents somewhere to enjoy and take ownership of. The space also gives residents the opportunity to interact with newly attracted wildlife.
