

Manvers Court

Residential Landscaping Scheme

This project was part of Nottingham City Homes' (NCH) Decent Neighbourhoods' Programme, following a £7.5m package of works carried out to insulate and refurbish three tower blocks consisting of 270 flats.

In order to create a sense of pride and ownership for the Nottingham City Homes residents, we took inspiration from what was a patch of disused urban space and designed a pocket park themed show garden for RHS Flower Show Tatton Park 2016, which was relocated permanently after being awarded Best in Category and a RHS Gold medal. Therefore part of Manvers Court Landscaping scheme now includes an award-winning show garden in which residents can relax and enjoy, that compliments the surrounding landscaping scheme.

The surrounding landscaping scheme has an abundance of plants including spring blossoming trees, summer and autumn flowering perennials and a wildflower meadow which runs alongside the building, creating seasonal interest all year round. New pathways were installed to inform a journey around the garden.
