

## Esendex Urban Garden

The project is located at Esendex offices in Nottingham. It was designed by Hosta Consulting, and installed by BESTbuild.

The two-storey office had an empty terrace space overlooked by student accommodation on three sides. Esendex wanted to utilise and enhance the outside space for their employees and give it a quirkier non-corporate feel that matched 'The Den' area they had previously created within the office. The rooftop is filled with planters, ivy-screens and art boards, and is split into three areas; a 'play space' at one end with bespoke pallet seating and table tennis tables. The middle section has a more formal feel, surrounded by ivy-screens, which can be used as a meeting space, and the opposite end hosts a pallet garden for relaxation and break time. Planting was chosen for its biodiversity value as well as to create a contemporary feel to the space, and includes: Heuchera 'Marmalade', Festuca glauca 'Intense Blue' and Crocosmias.
